

Because it takes more than a clicker.

The GHSA has added teeth to the pitch count rules; use an ineligible pitcher and you now forfeit the game. And with their pitch count tracking system, coaches are left to comb through the data and figure it all out for themselves. But there's another way. A simple, easy to use, automatic solution.

PitchKount saves you time and helps prevent the use of ineligible pitchers.

The screenshot shows the PitchKount interface with two reports. The first report is titled "Pitching Report - 2/28/2017 9:24AM EST" and is circled in red. It features a table with columns: Name, Hand, Level Locked, Last Pitched, Pitches Thrown, and Next Available. A red circle highlights a "No" icon and the text "Unavailable" above the table. The table lists three pitchers: Sharritt, Kelly M (R, 2/25/2017, 101, 3/1/2017), Shaw, Phillip A (B, 2/25/2017, 87, 3/1/2017), and Sheppard, Michael B (R, 2/25/2017, 94, 3/1/2017). The second report is titled "Limited Availability" and is circled in blue. It features a table with columns: Name, Hand, Last Pitched, Pitches Thrown, and Pitches Remaining. A blue circle highlights the text "Pitches Remaining" above the table. The table lists one pitcher: Ellison, Eddie T (B, 2/27/2017, 33, 77).
